## The Sustainability Cloud (TSC)

GTM Strategy Dashboard • India • 2026

Industry & Market Analysis

Where should TSC focus?

Filter by Industry

|      |            |           |
|------|------------|-----------|
| BFSI | Healthcare | IT & ITES |
|------|------------|-----------|

Industry Prioritization Matrix

| Criteria               | IT & ITES | BFSI        | Healthcare |
|------------------------|-----------|-------------|------------|
| ESG Maturity           | Very High | High        | Medium     |
| Net Zero Commitments   | Strong    | Strong      | Emerging   |
| Regulatory Pressure    | Medium    | High        | Medium     |
| Water Footprint        | Medium    | Low         | High       |
| Ease of Entry          | High      | Medium      | Medium     |
| Energy Consumption     | High      | Medium      | High       |
| Spending Capacity      | High      | High        | Medium     |
| ESG Journey Stage      | Advanced  | Progressing | Early      |
| Overall Attractiveness | 5 Stars   | 4 Stars     | 4 Stars    |

Target Companies

| Industry            | ESG Commitment             |
|---------------------|----------------------------|
| IT & ITES           |                            |
| Wipro               | Net Zero                   |
| TCS                 | Net Zero                   |
| Infosys             | Carbon Neutral             |
| HCLTech             | Net Zero                   |
| Healthcare          |                            |
| Manipal Hospitals   | Sustainable Healthcare     |
| Fortis              | Energy Efficiency Programs |
| Apollo Hospitals    | Carbon Neutrality Roadmap  |
| BFSI                |                            |
| Kotak Mahindra Bank | Green Banking              |
| ICICI Bank          | Sustainable Operations     |
| HDFC Bank           | Net Zero                   |
| Axis Bank           | ESG Integration            |

IT & ITES PAIN POINTS

- Scope 2 emissions from data centres
- RE100 commitments pending
- Energy-intensive campuses
- Data centre cooling costs

BFSI PAIN POINTS

- Green branch operations
- ESG disclosures to investors
- Regulatory pressure (SEBI/RBI)
- Financed emissions tracking

HEALTHCARE PAIN POINTS

- High electricity demand
- Water-intensive operations
- Medical waste management
- Carbon reporting gap

IT & ITES is the primary focus — highest ESG maturity, strongest spending capacity, and easiest entry point for TSC.

# Product Strategy & Competition

What should TSC sell & to whom?

Filter by Industry

|      |            |           |
|------|------------|-----------|
| BFSI | Healthcare | IT & ITES |
|------|------------|-----------|

**TSC Net Zero**

*Carbon tracking & decarbonization roadmap*

**TSC Energy**

*Energy optimization & cost reduction*

**TSC Water Offset**

*Water stewardship & positivity*

Product Market Fit

| Industry   | Net Zero Fit | Energy Fit  | Water Fit   |
|------------|--------------|-------------|-------------|
| BFSI       | Very Strong  | Strong      | Medium      |
| Healthcare | Strong       | Very Strong | Very Strong |
| IT & ITES  | Very Strong  | Very Strong | Strong      |

Competitive Landscape

| Company                   | Carbon Accounting | Energy Management | Water Management | India Focus |
|---------------------------|-------------------|-------------------|------------------|-------------|
| Updapt                    | No                | No                | No               | Yes         |
| TSC                       | Yes               | Yes               | Yes              | Yes         |
| Sphera                    | Partial           | No                | No               | No          |
| Siemens                   | No                | Yes               | No               | No          |
| Schneider Electric        | No                | Yes               | No               | No          |
| Salesforce Net Zero Cloud | Yes               | No                | No               | No          |
| Persefoni                 | Yes               | No                | No               | No          |
| Johnson Controls          | No                | Partial           | Yes              | No          |
| IBM Envizi                | Yes               | Partial           | No               | No          |
| Honeywell                 | No                | No                | Yes              | No          |
| Enablon                   | Partial           | No                | No               | No          |

Why TSC Wins

**Integrated Platform**

*Carbon + Energy + Water — all in one place*

**India-First**

*BRSR & SEBI compliance built-in*

**Fast ROI**

*Energy savings offset platform cost*

**Real Data**

*Operational tracking, not just reports*

**Partner Not Vendor**

*Advisory + software together*

**Scalable**

*Start with one product, grow to full suite*

No competitor offers Carbon + Energy + Water in one platform. TSC's integrated approach is its biggest differentiator.

## Stakeholder & Regulatory Landscape

Who to meet & what laws help us?

Stakeholder Priority Map

| Name                         | Priority  | Role Description                        |
|------------------------------|-----------|-----------------------------------------|
| CFO                          | Very High | Approves budget and financial decisions |
| Chief Sustainability Officer | Very High | Owens ESG strategy and targets          |
| ESG Head                     | Very High | Manages ESG reporting and compliance    |
| Operations Head              | Medium    | Day-to-day operations management        |
| Procurement Head             | Medium    | Evaluates and selects vendors           |
| Facilities Head              | High      | Manages buildings energy and water      |

Regulatory Landscape

| Name                    | Region | Role Description                                                     |
|-------------------------|--------|----------------------------------------------------------------------|
| BRSR                    | India  | Mandatory ESG reporting for top 1000 listed companies in India       |
| BRSR Core               | India  | Extended value chain disclosures for top 150 listed companies        |
| Energy Conservation Act | India  | Energy efficiency mandate for large consumers                        |
| SEBI ESG Requirements   | India  | ESG governance mandatory for all listed companies                    |
| CBAM                    | Global | EU carbon border tax affecting exporters                             |
| CDP                     | Global | Carbon data public disclosure                                        |
| GHG Protocol            | Global | Global standard for measuring and reporting greenhouse gas emissions |
| ISSB S1 & S2            | Global | Global sustainability disclosure standards                           |
| SBTi                    | Global | Science-based emission reduction targets                             |
| TCFD                    | Global | Climate risk disclosure for financial sector                         |

CFO, CSO and ESG Head are the power triangle — no deal closes without all three aligned. Regulations create urgency; TSC converts that urgency into action.

## 90-Day GTM Execution Plan

How & when to execute?

Filter by Phase

Phase 1

Phase 2

Phase 3

### PHASE 1 — FOUNDATION

Day 0 to 30

- 🎯 50 Target Companies
- 📞 20 Discovery Calls
- 🔑 100 Key Contacts
- 📊 10 Qualified Opportunities
- 📈 3x Pipeline Coverage

Focus: Pipeline Creation

### PHASE 2 — ENGAGEMENT

Day 31 to 60

- 💬 20 Customer Meetings
- 🧩 10 Workshops
- 📄 5 Proposals
- 🗣️ 3 Pilot Discussions
- 📁 10 Opportunities

Focus: Solution Positioning

### PHASE 3 — CONVERSION

Day 61 to 90

- 🚀 2-3 Pilots Live
- 🏆 2 Early Wins
- 💰 4x Revenue Pipeline
- 👤 1 Reference Account

Focus: Revenue Creation

### Phase-wise KPI Summary

| KPI                     | Target            |
|-------------------------|-------------------|
| Customer Meetings       | 20                |
| Discovery Calls         | 20                |
| Early Wins              | 2                 |
| Key Contacts            | 100               |
| Opportunities           | 10                |
| Pilot Discussions       | 3                 |
| Pilots Live             | 2-3               |
| Pipeline Coverage       | 3x Revenue Target |
| Proposals               | 5                 |
| Qualified Opportunities | 10                |
| Reference Accounts      | 1                 |
| Revenue Pipeline        | 4x Revenue Target |
| Target Companies        | 50                |
| Workshops               | 10                |

### Key Activities Per Phase

#### Phase 1 — Research

Build account universe • Identify decision makers • Initial outreach

#### Phase 2 — Engagement

Discovery workshops • ROI quantification • Business cases

#### Phase 3 — Conversion

Negotiations • Onboarding • Case studies • Reference accounts

90 days — 3 clear phases — from pipeline creation to revenue. Focus on IT & ITES first for fastest early wins.

# Key Takeaways

## ■ IT & ITES is #1 Target

5 Stars · highest ESG maturity · easiest entry point

## ■ TSC's Unique Advantage

Only platform: Carbon + Energy + Water in one suite

## ■ The Power Triangle

CFO + CSO + ESG Head — no deal closes without all three

## ■■ Regulations = Built-in Demand

BRSR · SEBI · CBAM · SBTi create urgency to buy NOW

## ■■ 90 Days · 3 Clear Phases

Foundation → Engagement → 2-3 Early Wins
